

LED

Street Lights

Our new European-style LED street lights fuse functional and robust design with intelligent technology to dramatically cut energy costs without sacrificing on light-output.

A better quality of light and an optimal distribution is ensured by the high-performance Samsung LEDs. They beam up to 15,000 lumens of light and are supported by an IP66-rated enclosure, leading to a typical lifespan of 50,000 hours. CREE chips are also available upon demand, just speak to one of our dedicated account managers for more information on 0161 655 0660.

A versatile installation process is simplified thanks to the tool-free open clip, adjustable adapter and the option to install both vertically and horizontally. There is also an additional photocell option for a fully automated lighting solution.

Technical information

Model	Wattage	Colour	CCT	Dimmable	ErP Lumens	Lumens per Watt	Dimensions	Net Weight
STREET-35	35W	Daylight	4000K	NO	3800	110	690 x 305 x 135 mm	6.2 kg
STREET-90	90W	Daylight	4000K	NO	9000	100	690 x 305 x 135 mm	8.2 kg
STREET-150	150W	Daylight	4000K	NO	15000	100	829 x 385 x 172 mm	12.3 kg

Common attributes

⊕ Input Power	AC100 - 277V
⚡ Power Factor	>0.90
⚡ Frequency	50/60 Hz
📐 Beam angle	145° x 85°
👁️ CRI	Ra >70
⏸️ Dimmable	No
🌡️ Operating temperature	-40°C ~ 45°C
💧 Operating humidity	10 - 90% RH
🕒 Lifespan	50,000 hrs
📦 Shell Material	Aluminium+PMMA+Glass
☔ Ingress Protection rating	IP66
🔨 Impact Protection Rating	IK08

Additional Features

- ✓ European Style
- ✓ SAMSUNG LED (standard) / CREE LED (optional)
- ✓ Class II & 0 - 10V Dim PSU
- ✓ Surge Arrestor: 10KV
- ✓ Intelligent Control system
- ✓ Type II, III & IV Light distribution

Designed for
LUMILiFE Great Britain
