T8 Tube Lights

These new and improved LUMiLiFe tubes have been designed to replace older, inefficient fluorescent units in offices, care-homes, commercial settings and the like.

As well as saving money on energy bills, your maintenance costs will also be lowered as they come with extra-long 50,000hr lifespans. Plus, LED tubes maintain their quality and brightness over time, unlike traditional tubes that flicker as they get older.

They come with an extra-wide 210° beam angle to give you enhanced lighting coverage, and they're all available in Cool White, Warm White and Daylight colours too.

Design-wise, they each feature a full glass cover that has coating inside to help with heat dissipation.
