## Recessed with frame

① **Cut a hole in ceiling according to cutout size of recessed frame.**

② Fix 2pcs of clips to one side of frame by screw, then insert the frame into ceiling.
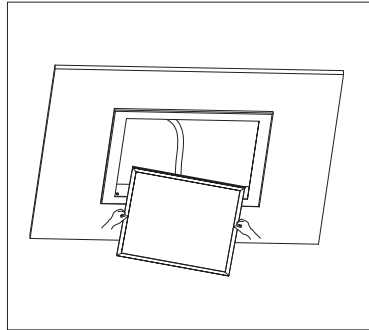

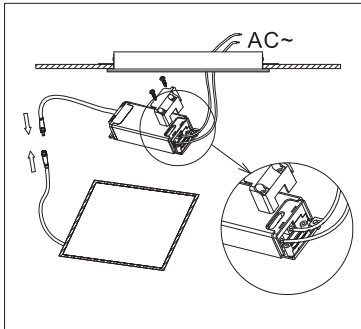

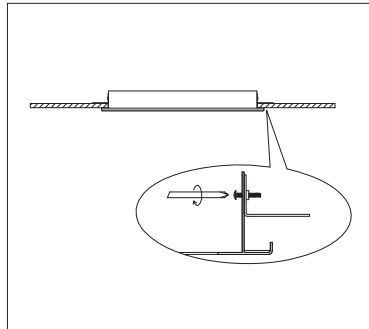

③ Fasten the frame into ceiling by screwing another 2 pcs clips on the other side of frame.

AC~

④ Feed the main AC wire in terminal block respectively.

⑤ Fix led panel light into the recessed frame.

⑥ **Instillation complete**

Warning:
Input wire diameter ≥0.75mm²;
Product modification and improper installation are not valid for warranty!

Note: If the diffused material LGP is constructed from quality PS material, while discoloration of LED panel is easily generated with exposure to sunlight/UV. In general installation area, places without sunlight/UV, PS is strong enough to support. However, sunlight/UV can cause discoloration, under this circumstance, we would recommend the use of LED panel made of PMMA material. Please note warranty does not cover discoloration of diffused material.

LUMiLiFe LED PANEL LIGHT INSTRUCTION MANUAL

LED PANEL LIGHT INSTRUCTION MANUAL
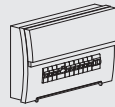

Safety Instruction:

Basic safety precautions should always be followed when installing, including the following:
1. Read instructions carefully before installing.
2. This LED Panel requires professional installation and maintenance.
3. The power supply of the LED Panel should be powered by a dedicated external LED driver.
4. Disconnect the power supply before installing or maintenance.
5. Make sure the wires have been properly connected before powering on the device.
6. Ensure the product has enough space for heat dissipation.
7. Ensure the luminaries are never covered by any heat insulation mat or slim layer material at anytime.
8. **Dimmable version available with compatible TRIAC Drivers**
9. **IP40 for Indoor use only, do not use in places with moisture;**
10. Ambient Temperature: -10℃ to + 45℃, Avoid direct sunlight.
11. Storage Conditions: Cool & dry conditions.

Installation Procedure

⚡ WARNING:

1. Switch off before installation.
2. Switch on only after complete installation and examination of the circuit.
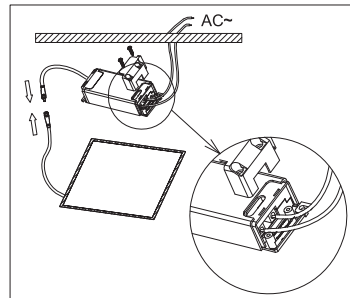

Turn Off Power Supply

⚠ CAUTION:

Make sure that the mounting surface or structural member used for installation can support the weight of LED Panel.
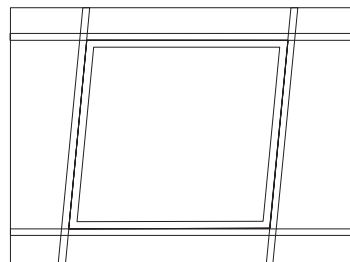

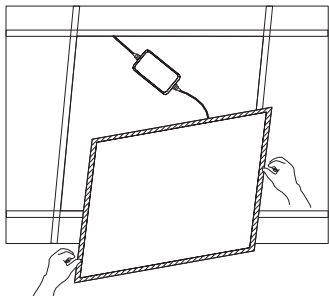

Recessed

① Remove the ceiling plaster slab.

② Feed the main AC wire in driver terminal block respectively, connect the panel light and driver.

③ Fix the panel light into plaster ceiling.

④ Make sure the led panel light is firmly fixed, turn on the power.
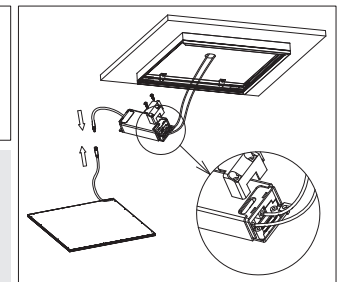

AC~

Suspended

① ② ③ ④

① Punch the plastic anchor into the ceiling, then fix the holder on the ceiling with screws.
② **Feed the steel ropes though the installation hooks on the panel light.**
③ Feed the steel ropes to the holder on ceiling and adjust the length of suspending ropes.
④ Feed the main AC wire in driver terminal block respectively, turn on the power.
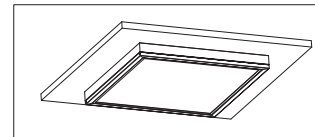

Surface mounted

AC~

① Fix the frame on the ceiling with screws.

② Unscrew the side frame and pull down.

③ Feed the main AC wire in driver terminal block respectively.

④ Connect the driver and panel light, push the panel light into the frame.

⑤ Fix the side frame by screw.

⑥ Make sure the frame and panel light are firmly fixed, turn on the power.
